Winter Temperature Fun Facts

- The lowest temperature ever recorded was at Vostok Station in Antarctica. On July 21, 1983, it was -98.2 degrees Celsius (-128.6 Fahrenheit) there!
- Some of the other coldest places in the world are Russia (specifically Siberia), Finland, and Mongolia.
- The months December, January, and February are winter months in the Northern Hemisphere, but in the Southern Hemisphere (for example, in Australia) the coldest months of the year are actually June, July, and August!
- At -40 degrees Celsius (which is also -40 degrees Fahrenheit), the condensation from your breath can actually **freeze**.

Cherney Properties main office holiday hours...

Reminder to Lock your Vehicles...

Our staff has been made aware of various items being stolen from in and around Vehicles parked in the Underground Parking Garage. Please remember to lock your vehicles at all times when not in use, and don't leave any items of value or exposed for someone to take.

After hours' emergencies...

In the event of an emergency outside of regular business hours including weekends, statutory holidays and Monday through Friday before 8:30am and after 4:30pm. **Please call 705-876-1717 and press '5'.**

Christmas Potluck... Mark **Sunday, December 15th** on your calendars! The Annual Tenant Christmas Potluck will take place between 4:30pm and 6:30pm. The signup sheet will be posted at the Valley High 2 office.

Prepare for cold weather snaps...

Check weather reports. Environment Canada issues special alerts to notify Canadians of impending severe weather! Avoid opening your windows if it gets too hot in your apartment; lower the thermostat to 15.5C (60F) instead. *Never turn the heat off completely!* Place furniture and heavy drapes away from radiators so as not to block the movement of room air. **Fill out a maintenance work request if a heat issue or lack of heat persists within your unit.**

Winter Animal Fun Facts

- Depending on the season, some animals actually change color! For example, the arctic fox's fur changes to white during the winter so that it can better blend in with the snow.
- Monarch butterflies actually migrate to avoid cold weather; starting in early fall, they start their long journey south, and arrive at a very specific location in Mexico in November. They start heading back up north in the spring-time.
- Many animals, such as the black bear, hibernate during the winter. In the winter, a black bear's heartbeat can slow to 8 beats a minute (from the usual 40 or so) and it can go as long as 100 days without food!
